

Timer 1 is 16 bits (65536)

$$\frac{65536 \text{ cycle}}{16 \text{ MHz} \left( \frac{\text{cycle}}{\text{sec}} \right)} = 4.096 \text{ millisecc}$$

## Interrupt Handler

- 1) Processor Stops -
- 2) Records location & Variable
- 3) Jump to ISR
- 4) No argument/return  $\rightarrow$  void ISR(void)
- 5) Simple & Fast
- 6)  $\rightarrow$  Resets to where it was

Transmit & Serial (9600 Baud  $\rightarrow$  104  $\mu$ )

char avail.
